National University of Singapore

Become a Master of the Future Economies

Find out how you can position yourself as a sought-after talent in a new age with a prestigious Master's Degree by Coursework from the National University of Singapore (NUS).

Ranked #1 in Asia and #11 globally in the QS World University Rankings 2023, NUS is the right choice if you want to gain the right competencies to take advantage of the opportunities that are emerging with the Digital Economy, Green Economy, Care Economy, Industry 4.0 Economy and more.

Deep dive in what NUS can offer you at our two-day virtual education fair. Hear experts speak at Masterclass Sessions, explore your programmes of interest at Information Sessions, talk to programme consultants at Virtual Booths, and stand a chance to win an iPad Air!

Get ready for tomorrow, starting today—at the National University of Singapore Postgraduate by Coursework Fair 2022 (NUS PGCF 2022). #TheTimelsNow

PROGRAMME (DAY 1)

Tue, 4 Oct 2022

TIME (SGT)

10:00am–5:00pm **Speak to Our Programme Consultants**
Visit our Virtual Booths to learn more about the various Master's Degree by Coursework programmes. Get a chance to speak to our programme consultants to have your questions answered.

Virtual Booth

10:00am–11:00am **Institute of Systems Science Masterclass**
Feature Engineering for the Internet of Things
In this digital transformation era, we have seen the rise of digital platforms and increased usages of devices particularly in the area of wearables and the Internet of Things (IoT). Given the fast pace change to the IoT landscape and devices, data has become one of the important source of truth for analytics and continuous streaming of data from sensors have also emerged as one of the fuel that revolutionise the emergence of IoT. These includes health telematics, vehicle telematics, predictive maintenance of equipment, manufacturing quality management, consumer behaviour, and more. With this, we will give you an introduction on how to leverage the power of data science and machine learning to understand and explore feature engineering of IoT and sensor data.

Consultant, Software Systems Practice
Institute of Systems Science
NUS

Masterclass Session Digital Economy

TIME (SGT)

11:00am–12:00pm **Master of Science (Maritime Technology and Management) Masterclass**
Adventure of Digital Twinning for Next Generation Ports—Learning from and for the Future

- The unique role of Singapore in maritime history
- Trend and challenges in the global maritime sector
- Digital twinning for a crystal ball with analytics into the future
- Maritime technologies—past, present and the future
- Maritime managerial insights for the future

Senior Lecturer Li Haobin
Academic Director, Master of Science (Maritime Technology and Management) Programme

Department of Industrial Systems Engineering and Management (ISEM)
College of Design and Engineering
NUS

Masterclass Session Digital Economy Industry 4.0 Economy

12:00pm–1:30pm **Master of Science in Industry 4.0 Masterclass**
Industry 4.0—Artificial Intelligence, Robotics and Automation

- Staying competitive in the fourth industrial revolution (Industry 4.0)
- The need for industries with established processes, operations, supply chains and technologies to change and improve
- Impact of Industry 4.0-related technologies such as Internet of Things (IoT), Artificial Intelligence (AI), Robotics and Automation on industries, job profiles and sustainability
- The challenges ahead, and the drive for industry, academia and research to change in order to prepare for a unique tomorrow

Associate Professor Prahlad Vadakkepat

Department of Electrical and Computer Engineering
College of Design and Engineering
NUS

Masterclass Session Industry 4.0 Economy

1:30pm–2:30pm **Faculty of Dentistry Masterclass**
The Wisdom behind Wisdom Teeth Surgery
Third Molar Surgery Workshop

Associate Professor Intekhab Islam

Faculty of Dentistry
NUS

Masterclass Session Care Economy

TIME (SGT)

2:30pm–3:30pm **Master of Arts (Arts and Cultural Entrepreneurship) Masterclass**
The 'Art' of Entrepreneurship
This masterclass introduces students to arts and cultural entrepreneurship. It discusses the creative cultural industry sector, introduces the sector innovation of art, culture and technology, and situates the 'art' of entrepreneurship in its unique creative cultural ecosystem.

PROGRAMME (DAY 2)

Wed, 5 Oct 2022

TIME (SGT)

10:00am–5:00pm **Speak to Our Programme Consultants**
Visit our Virtual Booths to learn more about the various Master's Degree by Coursework programmes. Get a chance to speak to our programme consultants to have your questions answered.

Virtual Booth

10:00am–11:00am **Institute of Systems Science Masterclass**
Predictive Analytics
With the use of Predictive Analytics, companies are able to predict future trends based on existing available data. The actionable business predictions can help companies achieve cost savings, higher revenue, better resource allocation and efficiency. Predictive analytics has been used in various sectors such as banking & finance, sales & marketing, logistics, retail, healthcare and F&B for various purposes. Get set to learn more about the different stages of predictive analytics modelling such as data collection & preparation, model development & evaluation metrics, and model deployment considerations will be discussed.

NUS

Senior Lecturer Brian Ang
Consultant, Data Science Practice

Institute of Systems Science
NUS

Masterclass Session Digital Economy

TIME (SGT)

11:00am–12:00pm **Master of Science (Maritime Technology and Management) Masterclass**
Hybrid Simulation Modeling Formalism for Mega Container Terminals in Singapore
This masterclass briefly introduces the hybrid simulation modeling formalism for mega container terminals in Singapore, which is a scientific approach and innovative development towards practical application in the modeling of mega container ports. The hybrid formalism has an “event-based” kernel for accurately describing the rules of discrete-event systems; it adopts a “state-based” modularisation for the segmented hierarchical structure of a complex industrial system, to simplify the process of modeling, as well as the maintenance and reusability of the model library; and, through the “activity-based” perspective, it provides an overview on the dynamics of all flowing entities in the system. This approach effectively enhanced the simulation and modeling capability of port terminals in Singapore, and prepared the students to address practical operational problems in mega container terminals with higher complexity.

Senior Lecturer Li Haobin

NUS

Masterclass Session Digital Economy Industry 4.0 Economy

TIME (SGT)

1:00pm–2:00pm **Master of Social Sciences (Communication) Masterclass (Two Topics)**
“It Makes Me Feel Seen”: Ways of Watching Shang Chi from a Global Perspective
This talk will explore meaning-making and how it is dependent on an audience's cultural context. Using Shang Chi as an example, it will touch on how ‘representation matters’ for minority audiences, American cultural hegemony and the problems with promoting this film to a Chinese market.

Senior Lecturer Rosemary Overell

Department of Communications and New Media
Faculty of Arts & Social Sciences
NUS

Digital Transformation in Strategic Communication Industry

This Masterclass will explore how emerging technologies are transforming the strategic communication industry as well as public relations and advertising practices. Topic such as how Augmented Reality (AR) and Virtual Reality (VR) can be used to enhance the audience experience, why an understanding of big data is important for campaign-planning, and how Artificial Intelligence (AI) helps speed up communication processes in the strategic communication industry will be discussed.

4:00pm

Master of Science in Environmental Engineering Masterclass

Singapore's Approach to Coastal Protection

This session will provide insights on the key strategies and approaches for coastal protection that Singapore's national water agency, the Public Utilities Board (PUB), will adopt in order to enhance the country's resilience against sea level rise and to take this opportunity to reimagine Singapore's coastline. Aligned with this set of approaches, PUB will embark on site-specific studies, develop a Coastal Protection Masterplan and drive research studies to build knowledge as well as develop local capability in coastal protection.

Mr Ho Chai Teck

Carbon Markets as Foundations for Nature- Based Climate Solutions

Climate change represents a major threat to social, environmental and economic systems. It is essential that carbon emissions are rapidly reduced towards net zero if we want to have a chance to keep global warming below 1.5 degrees, thus avoiding irreversible tipping points. Carbon markets represent one of the most promising tools to accelerate a transition towards green energy. Here I will present their foundations and explain how carbon markets can be applied to projects that focus on nature conservation and restoration as climate change mitigations solutions.
