

Mr Daniel Erasmus

Chief Executive Officer
Erasmus.AI

Daniel as CEO Erasmus.AI has two decades of experience in collecting and processing planetary scale datasets. The Erasmus.AI platform built its own search engine to visualise, augment, inform and reveal hidden connections in the world's news at web-scale. The team lead the development of ClimateGPT foundational and fine-tuned model family, which is the world's first foundational AI model family focused on effects of Climate Change on Human Systems, pioneering domain specific models, built with green power, achieving 12x reduction CO2 per equivalent query. After building and fine-tuning 250 models ClimateGPT 1 was followed up with Model 2 in January 2024. Additionally, Daniel is Head of AI for Internet Archive Europe, releasing several public purpose models in 2025.

He is a Full Member of the Club of Rome, building on more than 25 years' experience running global foresight processes as co-founder of The Digital Thinking Network. The DTN lead scenario and innovation breakthrough processes for governments and Fortune 50 companies anticipating Global Financial Crisis, Oil Price Collapse, created the first CBDCs, reference architectures for Cybersecurity, Cloud, AI, etc several resulting multi-billion Dollar direct profits, and 10x investment, returns over 3 years. Additionally, as a response to Covid, he was instrumental in creating an initiative that has sponsored 100M meals in Southern Africa.
