What is Propolis?

Propolis is a sticky substance which is gathered by the bees from tree barks and leaves. The bees then mixed this substance with their own secretion. Propolis is very rich in amino acids, vitamins, minerals and flavonoid.

Why Brazil Propolis is different from other part of the world?

There are two main reasons for this. The first one is the type of bees. In Brazil we work with the Africanized Honey Bee (apis melifera scutelata). This special kind of bees has a different way to collect propolis in the plants. If there are 2 types of bees in an area, Africanized Honey Bees and European Honey Bees, they will produce different kinds of propolis.

The second reason is the bio diversity of Brazilian flora. In North Hemisphere propolis is produced mainly by 2 types of plants. In Brazil, Propolis is found in more than 300 different types of plants.

Researches made in Brazil and mainly in Japan show that the Green Type Propolis produced in some areas of Sao Paulo and Minas Gerais States in Brazil has the most contents of phenolic compounds, specially the flavonoids, and some esters very important to control some diseases, especially Artepillin C.
**What is propolis use for?**

Propolis is widely known to be nature’s anti-biotic. It is also anti-viral, anti-fungal, anti-septic and anti-bacterial. Its usage is very wide and is commonly used for the following:

<table>
<thead>
<tr>
<th>Use for</th>

Pure Propolis (Japan)

Boost Immunity
Regulate Blood Pressure
Anti-Aging
Reduce Inflammation  Lower Blood Cholesterol  Improve Blood Circulation
Prevent Radiological Damage
Anti-Cancer
Regulate Blood Sugar Level
Respiratory Distress
Insomnia

Pure Propolis is extracted from the superior Propolis by using Supercritical Fluid Extraction CO2 (SFE) method. SFE technology promises to keep its freshness, free of biological contamination and maintain the flavonoids’ potency at optimum level.
Pure Propolis Premium (Japan)

Boost Immunity
Regulate Blood Pressure
Anti-Aging
Reduce Inflammation Lower Blood Cholesterol Improve Blood Circulation
Prevent Radiological Damage Anti-Cancer
Regulate Blood Sugar Level Respiratory Distress
Insomnia

Pure Propolis Premium is to enhance the effect of Pure Propolis with the addition of Ganoderma Lucidum (Lingzhi) spore oil. Ganoderma Lucidum spore oil is the most treasured as it is the main active ingredient of Ganoderma Spore.

Via the advanced CO2 Super-critical technology, Ganoderma Lucidum Spore Oil was distilled directly from Sporoderm-broken Ganoderma Lucidum Spore. Ganoderma Lucidum spore oil is purer and the components are more complete. It contains Triterpenes which is the specific ingredient of Ganoderma. The functions of triterpenes are blood purifying, liver protecting and help to improve the capability of the body to tolerate diseases.
What is Honey?

Honey, this product is made by bees since early ADs, people has start using bee's products like honey as a food, medical / therapy usage and more.

Where Honey came from?

Honey is produced by the bees, they collect nectar from flowers within the 3km radius from their hives.

How Pure Honey taste?

Different types of honey taste differently, as there are different types of flower therefore the taste is different. The fundamental of honey taste is to have a floral taste at the ending part in your mouth, some honey had a strong taste and some taste light due to the nectar which the bee collected from the flower.
**Organic and Natural Honey**

Acacia Honey (Romania)

Acacia Flower Honey from the Acacia trees are direct from the unpolluted highland of Romania, grown only on mineral rich land. Hail as liquid gold in Europe. Organic Acacia Honey is ranked as one of the top honey in the world. Supreme high quality natural flower honey with exceptional taste, clear and smooth with a delicate floral aroma separate itself from other types of honey. Certified organic by SC Ecoinspect s.r.l.

Try a spoonful in your evening espresso or drizzled over whole wheat bread. Elegant! Natural Acacia Honey is available. This well known pure natural honey comes from the unpolluted plains of central Romania.

Acacia tree has its own medical properties that make it different from others. It is clear, transparent golden with fine acacia aroma. Acacia Honey helps in detoxifying the liver, anti-inflammatory for the respiratory system, improves digestive, immune system & assists in blood circulation. Acacia Honey is the best choice for the elderly, young kids and even diabetics due to its high, but not excessive fructose content and very low sucrose contents. Also available: Organic Acacia Honey is being certified by SC Ecoinspect s.r.l.
Linden Honey (Romania)

Certified organic by SC Ecoinspect s.r.l. The linden trees are grown from the clean and green environment of Romanian Highlands. Organic Linden honey is gaining popularity because it carries a unique and captivating lime aroma that is good enough to drink it on its own.

Linden Honey is very popular in Europe and prized for its delicious taste and calming properties. It is light amber in color with a mild lime flavour. This honey is particularly good for prevention of colds and flu. It also differs from other sorts of honey because of its natural sedative and antiseptic qualities of Linden trees. It is commendable in cases of anxiety and insomnia. This honey is considered valuable in relieving headaches, indigestion. Linden Honey helps to regulate blood pressure, and for indigestion associated with nervous tension. It is also known to enhance human immune system. Also available: Organic Linden Honey is being certified by SC Ecoinspect s.r.l.
